MOUNT

GENERAL TOOLS

AT71127 5 Piece Wire Installer's Kit

Applicable:

Developed for safer and more accurate working in electrical wiring, re-wiring, and component placement and removal operations while reducing the chance of damage to a wire's insulation. Useful in all kinds of automotive, aerospace, marine and industrial environments these wire control tools allow the user to push, pull, and feed wires safer in hard to reach areas and panels.

Carefully selected tool tips assist the placement and extraction of cables, connectors and components. Enable safer prying and opening of control panels, inspection covers and plastic case assemblies.

Not Warranted for High Voltage Use We have three different colors: Red, Black, Blue

AT71129 Hot Stapler Plastic Repair System

Applicable:

Hot Plastic Stapler lightweight, handheld machine enables metal staples to be pressed into plastics in a quick and simple process, so lugs on lighting housing and splits in plastic parts can be stapled together, often saving them from the scrap heap.

Power: 110 ~ 240V Material: PS

AT71131 Fixing Clamp Set

Applicable:

For a clamping range of 0-5mm.

Instead of grip or clamp pliers, use the fixing clamp to fix metal sheets. Put the fixing clamp into the special pliers and open them. Slide the opened fixing clamp over the metal sheets. Finally release the load abd remove the pliers from the metal sheets. You can remove the fixing clamp in the opposite way.

Advantages:

- -Quick installation and removal of the clamps.
- -Wide clamping range at small dimensions.
- -Easy to readjust the metal sheets.
- -Low-price alternative instead of grip pliers.
- -The small dimension (like a door sealing) allows to adjust different gaps easily.
- -Application also for hardly accessible places.

Material: Cr-Mo Steel, Chrome Plated Finish

AT71133 25PCs Thread Extractor Set

Applicable:

Special design for broken screw in the engine or general using.

Material: Special Steel, Black Finish
